

4^h Grade Summer Reading and Math

Congratulations on completing 3rd grade!! Summer is a time to relax and have fun. However, if you don't keep up with the skills you have learned, they will quickly pass away before you return. These activities are meant to help you prepare for the upcoming school year in 4th grade. It is important to continue reading and working on math skills.

Reading

Reading DOESN'T HAVE TO BE A CHORE! Take a book along during car rides, read on a rainy summer day, or read while you're at the beach. It is important to continue reading in order to prepare yourself for 4th grade.

Math and Reading: Students must practice 30 min of Math and 30 min. of Reading Skills each week by logging into their school IXL account. Please pay particular attention to the multiplication and division fluency practice areas.

Additionally, each student should read 2, grade level appropriate books, over the summer. They should be books the student has not yet read. See below for suggested titles.

Check out the following sites for some suggested summer reading titles
